

For bleeding wounds

Plus moist HSP / HSP-W (Plus moist HemostaPad)

Plus moist HSP / HSP-W is a new wound dressing which consists of calcium alginate nonwoven. Plus moist HSP / HSP-W definitely and speedily stops bleeding because of calcium ion efflux, and then could promote local healing in a moist environment without adherent to wound.

Additionally the barrier film which is another construction material of Plus moist HSP / HSP-W assists to prevent to leak out the blood and dry out on wound surface.

Hence, Plus moist HSP / HSP-W is ideal for e.g. emergency room, army, outpatient care, school infirmary and sports injury care. Of course, HSP / HSP-W can use for bleeding from any operative wound except for organs.

Features :

- 1)Excellent Hemostasis.
- 2)Superior absorption ability (20g/100cm²).
- 3)Prevention of spreading out and leakage out of blood.
- 4)Unique non-adherent.
- 5)Keeping moist environment without film dressing.
- 6)Able to cut for any size and shape.

Example of how to use :

E.g. abrasion, laceration, crushed wound, incision wound

Trim into the size and shape, then, cover and apply compression on the wound and then secure with surgical tape etc.

Excellent hemostasis
Non-adherent
Free of pain
